

ACCELERATED EXPERIENCES, LLC

Detailed Specification

The drafted WCCTC site – what was found, what is built, how AA is met

SUBMITTED TO

West Contra Costa Transportation Commission · John Nemeth, Executive Director

COMPANION TO

The proposal (eight pages, in the RFP's Section 8 order) and the drafted site delivered as a short film

READ FROM

The corrected RFP of August 25, 2026 and the live site westcontracostatc.gov - read September 4, 2026

DUE

Friday, September 25, 2026 · 5:00 PM Pacific

PREPARED BY

Anthony Esposito · Digital & Creative Engineer/Founder · Post Falls, Idaho

CONTACT

208-618-1989 · ae@aexperiences.studio · aexperiences.com

Technical companion, linked from the proposal so the proposal stays inside the page limit. Read the two together.

SECTION 1

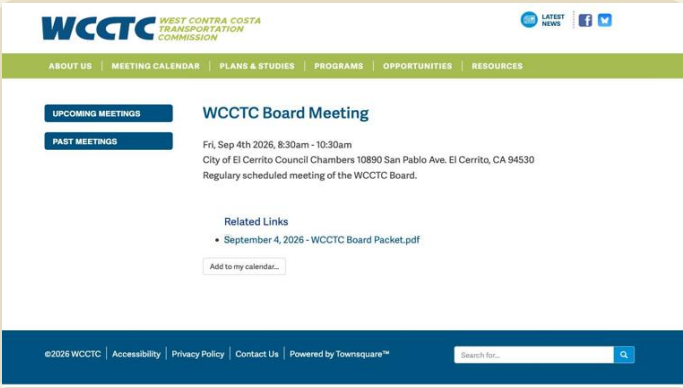

Findings from the live site

Read off the markup of westcontracostatc.gov on September 4, 2026, with a browser's developer tools and a keyboard - not an automated scan. Each finding names its WCAG 2.1 success criterion and what the draft does instead.

FINDING	CRITERION	EVIDENCE	IN THE DRAFT
Two hidden H1 headings on every page: "West Contra Costa Transportation Advisory Committee" - the wrong organization name, read twice before the page title	1.3.1 Info and Relationships · 2.4.6 Headings and Labels	h1.header-logo, rendered at 36 px and hidden; present on home, the calendar and every meeting page	One H1 per page naming that page; the logo is a link with a text alternative
No skip link	2.4.1 Bypass Blocks	No in-page link before the navigation on any page	"Skip to content" is the first element on every page
Keyboard focus relies on the browser default; no focus style defined	2.4.7 Focus Visible	Computed :focus outline-style empty on links	A 3-pixel amber outline with offset on every control
Homepage: six of nine images without alternative text	1.1.1 Non-text Content	document.images with empty alt: 6 of 9 (home), 2 of 2 (calendar)	Alt text written at migration; decorative images marked
Meeting pages carry one PDF packet and no HTML agenda	1.1.1 · 1.3.1 (PDF content)	Board Meeting Sep 4, 2026: one link, "September 4, 2026 - WCCTC Board Packet.pdf"	HTML agenda per meeting, packet tagged, minutes and recording on the same page
Language switching: none	3.1.2 Language of Parts (for translated content)	No lang alternatives offered; the RFP names limited-English-proficiency users	Spanish and Chinese pages for the most-used content, lang attributes set

WESTCONTRACOSTATC.GOV, HOME, SEP 4 2026

A MEETING PAGE TODAY - ONE PDF LINK

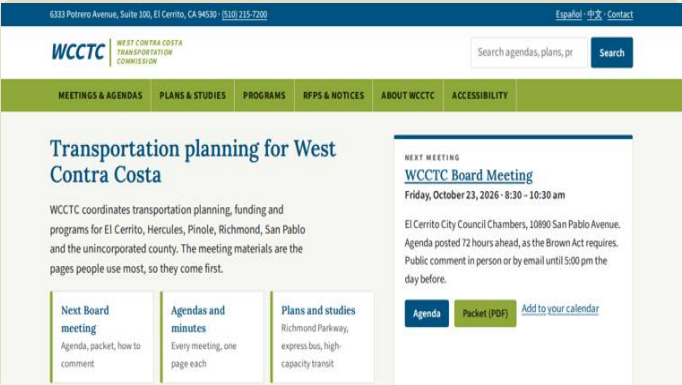

Why the heading matters more than it looks.

A screen-reader user navigates by headings. On the current site the first two headings on every page announce an organization that does not exist under that name, before the page's own title. It costs nothing to fix in a rebuild and it is the kind of thing an automated scan reports as "heading present" - which is why the RFP is right to ask for manual testing.

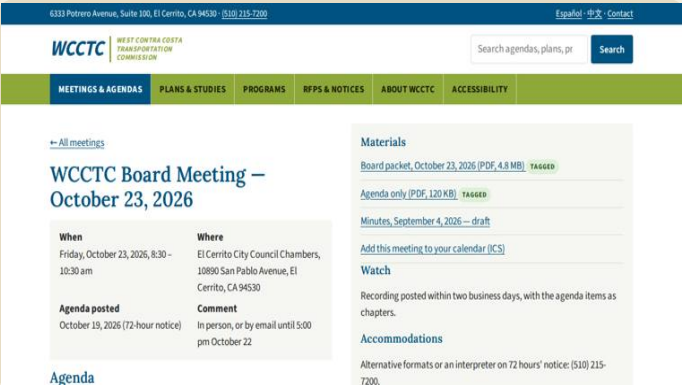

SECTION 2

The draft as built

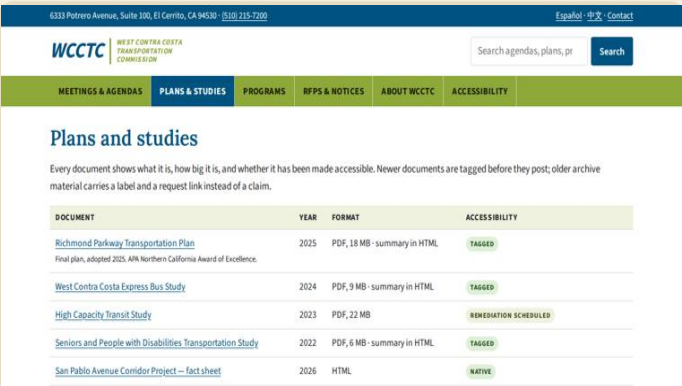

Eight pages of real HTML with real fonts, in WCCTC's blue (#005380) and green, with a serif for headings like the current site's Lora. It has the shape of a standard WordPress block theme so that the build is configuration on an accessible theme, not a custom-coded site. A draft for discussion; the seal and photography are placeholders.

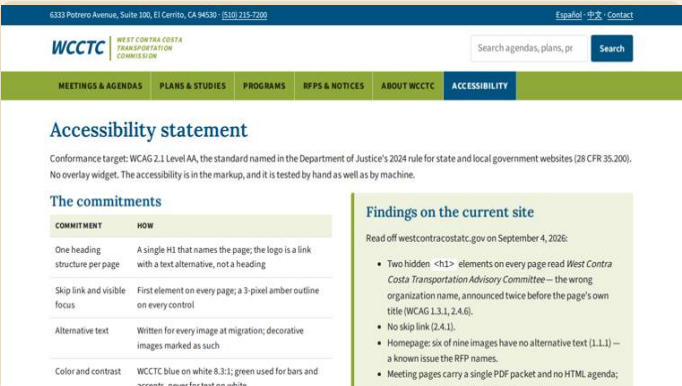

HOME - THE NEXT MEETING AND SIX DOORS

ONE MEETING, ONE PAGE - AGENDA IN HTML

PLANS AND STUDIES - ACCESSIBILITY LABELED PER DOCUMENT

THE ACCESSIBILITY STATEMENT, WITH THE FINDINGS

PAGE	CONTAINS
Home	Next Board meeting with agenda and packet buttons; six doors (next meeting, agendas and minutes, plans, programs, RFPs, board and staff); latest news; upcoming meetings table; the finding and what changes
Meetings and agendas	Upcoming meetings with agenda-post dates; past meetings with HTML agenda, tagged packet and approved minutes; ICS subscription per calendar; public comment and accommodation notes
One meeting	When, where, agenda posted date, comment deadline; the agenda as an ordered list with staff reports per item; materials sidebar (packet, agenda-only, minutes, ICS); recording within two business days
Plans and studies	Document table: title, year, format and size, accessibility status (tagged, or archive); the posting workflow explained
Programs	Student Bus Pass, Transportation Demand Management, STMP with its fee schedule, nexus study and annual report as tagged documents
RFPs and notices	Open procurements with Q&A on the same page; closed procurements; public notices linked to the meeting they belong to
About	Board of Directors by member agency; Technical Advisory Committee; public records; staff contact and an accessible form
Accessibility statement	Conformance target, the commitments table, the findings on the current site, and how to report a barrier

ELEMENT	WHAT THE DRAFT USES	STATUS
Palette	Blue #005380 (text and bars, 8.3:1 on white), green #8fa83a (navigation bar, accents - never body text on white), pale green #eef2df, ink #242629	Read off the current site; final values set with WCCTC
Type	Lora for headings (as today), Source Sans 3 for text; both open-license, served from the site, no third-party font call	Draft
Wordmark and seal	Text wordmark in the draft; the real WCCTC wordmark and seal drop in at design	Placeholder
Layout	One column on phones, two above 820 px; 1140 px maximum; no carousel	Draft
Components	Doors, next-meeting card, list rows, captioned tables, pills for document status, finding card, side panel	Maps to standard blocks

SECTION 3

Platform, build, migration and documents

AREA	SPECIFICATION
CMS	WordPress, current release, on managed hosting (WP Engine, Kinsta or Pressable - chosen with WCCTC at kickoff on price and support hours). An established accessible theme with a child theme carrying the WCCTC customization; the block editor; no page-builder plugins. Plugins limited to: an accessibility checker in the editor, a redirect manager, an events calendar with ICS output, a forms plugin with labeled fields and error text, and backups. Every plugin is mainstream and replaceable.
Accounts and ownership	Hosting, domain, DNS and WordPress administrator accounts are opened in WCCTC's name at kickoff. This firm holds a separate administrator account that WCCTC can remove at any time. Handover includes a written guide to the theme, the child theme, every plugin and every setting.
Migration	The pruned list from WCCTC's content audit, and only that. URLs preserved where the structure allows and redirected where it does not, so links printed on agendas and partner sites keep working. Alt text written for every image as it comes over; headings corrected; each meeting rebuilt as one page.
PDFs	The forty-two to fifty-two documents WCCTC's content audit identifies (answer to question seven, September 11, 2026) - seven substantial standalone documents and the 2025 to 2026 meeting agendas - remediated and tagged inside the base fee. The 2014 to 2024 meeting records migrate as a flat, dated archive of links, labeled "archive" (answers nine and ten). Simple tables publish as accessible HTML where that is the better reading (answer eleven). Going forward, a posting workflow checks title, language, tags and reading order before a document goes live and says in plain words what is missing, so everything published after launch is accessible from creation.
Public noticing	Agendas post with a visible posted-date; the meeting page carries the 72-hour notice date; RFP and STMP documents have their own pages with posted dates, so Brown Act and procurement postings are checkable by anyone.
Search	Site search across pages, meeting agendas and document titles, with the document's status shown in results.

SECTION 4

Accessibility – how AA is actually met

COMMITMENT	IMPLEMENTATION
Headings	One H1 per page; H2 and H3 in order; the logo is a link, not a heading
Skip link and focus	First element on every page; visible focus on every control; focus order follows reading order
Text alternatives	Alt text on every meaningful image; decorative images empty-alt; icons hidden from assistive technology
Contrast	Blue on white 8.3:1; green never used as text on white; large text and UI components checked at 3:1
Tables and lists	Every data table has a caption and column headers with scope; agendas are ordered lists
Forms	Every field has a visible label; errors described in words next to the field and announced; no color-only cues
Language	lang on the document and on Spanish and Chinese content; switcher on every page
Zoom and reflow	Pinch-to-zoom allowed; content reflows at 320 CSS pixels and 400 percent zoom without horizontal scrolling
Documents	The forty-two to fifty-two audited documents tagged; the posting workflow; the 2014 to 2024 archive as a dated list of links
Testing	axe-core plus keyboard-only and screen-reader passes on the four key templates before launch; results filed

The rule: no citation, no finding. Every accessibility finding, in the audit and at launch, names its WCAG 2.1 success criterion, the page, the element and the fix. A finding that cannot be cited is not reported - which is also how WCCTC can check the work without taking anyone's word for it.

SECTION 5

Testing, training and acceptance

AREA	SPECIFICATION
Pre-launch testing	Automated (axe-core) and manual (keyboard, NVDA on Windows, VoiceOver on Mac and iPhone) on home, meeting/agenda, document library and forms; browser pass on current Chrome, Safari, Firefox and Edge, desktop and mobile; a low-bandwidth pass on an older phone.
Training	One two-hour session for WCCTC editors, recorded, covering day-to-day editing, posting a meeting, posting a document through the workflow, alt text and headings. A short written user guide with a one-page checklist per task.
Acceptance	Staff sign off page by page against the plan written at kickoff; sign-off rests with WCCTC staff only (answer four). Launch checklist: redirects, forms, search, calendar feeds and the document workflow verified end to end. The conformance report - automated results and the manual findings on the key templates - is filed with the closeout, and WCCTC's acceptance of it is the acceptance for the scope; no separate auditor is engaged (answer eighteen). A four-week stabilization period follows launch inside the fee, and any accessibility defect found during the term is fixed at no cost (agreement Section 10).
Support (optional, 4.5)	Annual accessibility check-in - one manual re-test of the key templates and the year's new documents, written findings; or a maintenance retainer - updates, backups checked by restoring them, patches within seven days, up to two hours of changes a month.

Stated plainly, because you will check. The draft filmed in the tape is the draft described here; nothing is promised that is not standing in it or named as a stage of the work in the proposal.
